PROFILE SUMMARY

I'm an IT student with a passion for web development and a knowledge for tech support. I have experience building websites using frameword, creating smooth and responsive user experiences. Aside from coding, I also know my way around hardware basic troubleshooting and can help clients with basic tech issues.

EXPERIENCE

Creotec Immersion   2021

- Led a department during Creotec Immersion with other students. We were tasked to create 3 applications using app inventor: creopay, creofit, creoboard. It was a challenging task because of the adjustment on work method which is online.

Sutherland Internship   February - March 2024

- Started during the month of February and ended on March to render 300 hours. This experience has brought me new knowledge to handle hardware and support client with simple tech issues.

Onephp Internship   August - November 2024

- Gained hands-on experience in web development during my internship at Onephp, working with technologies like ASP.NET and mysql. Developed a problem-solving skills and improved proficiency in front-end and back-end development.

EDUCATION
